## Magnet Wire Equipment

### **Uniformity, Reliability and High Performance**

Our line of magnet wire termination machines is designed specifically for terminating magnet wire pigtail splices, thru splices, coils, MAG-MATE products and Crimpband, among others. MAG-MATE and AMPLIVAR splices and terminals are available in a wide range of configurations to meet most magnet wire termination needs—all provide high reliability with minimal wire preparation. Plus, many TE machines offer automatic precision adjustment functionality (CQM).

### **Magnet Wire Portfolio**

- [AMPLIVAR Product Terminators](#)

Our APT 5A and APT 5E terminators are engineered to crimp Magnet Wire and Pigtail AMPLIVAR Splices (up to three wires in one splice) and Direct Connect AMPLIVAR Contact Terminals.

- [Inverted AMPLIVAR Splice Applicators and Terminators](#)

The Inverted Splice Termination (IST) terminator and applicator can terminate pig-tail splices or thru-splices consisting of two or more stranded or magnet wires.
